

MD. Alvin Sarkar Sakib

Software Engineer Intern

✉ alvinsakib56@gmail.com 📍 Dhaka, Bangladesh 🌐 alvinsakib 🌐 alvinsakib

Education

BSc	Rajshahi University of Engineering & Technology , Computer Science & Engineering	Rajshahi, Bangladesh 2019 – 2025
Higher Secondary School	Cumilla Victoria Govt. College , Science	Cumilla, Bangladesh 2017 – 2019
Secondary School	Cumilla Zilla School , Science	Cumilla, Bangladesh 2012 – 2017

Experience

Samsung R&D Institute Bangladesh , Intern Engineer	Dhaka, Bangladesh 2026 – present 1 year
Conducting research and development in large language models, computer vision, on-device AI, and patent-related technical work.	
- Investigating large language model applications and evaluation approaches - Exploring computer vision and on-device AI solutions - Contributing to technical research and patent-oriented documentation	

Volunteer

RUET CSE Cultural Night , Event Volunteer	Rajshahi, Bangladesh July 2023 – July 2023
Supported the organization and execution of the RUET CSE Cultural Night.	
- Assisted event organization and stage management activities - Supported smooth execution of cultural programs	

Publications

An Attention Enhanced Transfer Learning Approach for Fetal Brain Plane Classification

An undergraduate research study on fetal brain plane classification using attention-enhanced transfer learning for medical image analysis.

Rukeiya Haque, Md. Alvin Sarkar Sakib

Skills

Artificial Intelligence: Large Language Models, Agentic AI, Multi-Agent Systems, Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Medical Image Analysis, AI Evaluation

Software Engineering: Python, Linux, Bash, Git, Docker, Backend Development, REST APIs, React, Laravel, Golang, SQL

Languages

Bengali
Native speaker

English
Fluent

Interests

Research Interests: Large Language Models, Agentic AI, AI Evaluation, Natural Language Processing, Computer Vision, Medical Image Analysis, On-Device AI

Certificates

- Python (Django), Bangladesh Computer Council (2025-08-12)

Projects

- Notes App: Full-Stack AI Assisted Note Management System
- Developed full-stack notes management with React and Laravel
- Implemented JWT authentication and RESTful CRUD APIs
- Integrated Claude AI for intelligent note suggestions
- Built search, categorization, priority, and status management
